

I-95 CC Vehicle Probe Project & VPP Suite Summer 2016

Stay informed on all things VPP & VPP Suite!

Please join us for the **VPP Suite User Group Web Meeting - July 28, 2016**

The next quarterly Vehicle Probe Project Suite User Group meeting is scheduled for July 28th (10:00am – 11:30am). This meeting will include a Spotlight Presentation from the South Jersey Transportation Planning Organization (see highlight below) as well as preliminary results from the recent VPP Suite Feature Deployment Prioritization Survey. As always, members will have a chance to ask questions or make suggestions related to all things VPP Suite!

VPP Suite Use Case presented by the South Jersey Transportation Planning Organization

The SJTPO is a New Jersey MPO unique in its geography demographics and economic drivers – several small cities amidst rural areas that are greatly influenced by gaming and tourism industries (Atlantic City and the “Jersey shore”). Hear how planning staff used the VPP Suite to meet Federally-mandated Congestion Management Process (CMP) requirements, and for their “Transportation Matters” Performance Report 2016 Update.

VPP Suite Feature Deployment Prioritization Survey is Proceeding!

We’re pleased to offer our User Group members the opportunity to select and prioritize potential VPP Suite improvements through the online prioritization survey. The results will be used to guide the development of new features and improved function of the VPP Suite apps so we can continue to advance the tools to your specifications. We intend to have some preliminary results for sharing and discussion with you.

Reminder- User Group Members please complete the Survey distributed on July 13, 2016. **This will be available until July 22, 2016.** Contact John Allen at jallen35@umd.edu for more information.

VPP Real-time Volume Project is Underway!

The I-95 Corridor Coalition is sponsoring research to accelerate the time frame to achieve viable volume and turning movement data through outsourced probe data. This is a joint effort with the CATT and the National Renewable Energy Laboratory. The primary goal is producing an initial product to help meet Member’s information needs for operations, performance measurement, and planning applications, with an understanding of the fidelity, potential and limitations of such data. The project kick-off meeting was recently held with the Steering Committee. Agency members should contact either principal investigator with questions (Stan Young, NREL at stanley.young@nrel.gov or Kaveh Farokhi Sadabadi, UMD CATT at kfarokhi@umd.edu).

Upcoming Meetings:

Please click the link below to register for the web meeting being held in July 2016.
